

How do you get your software?

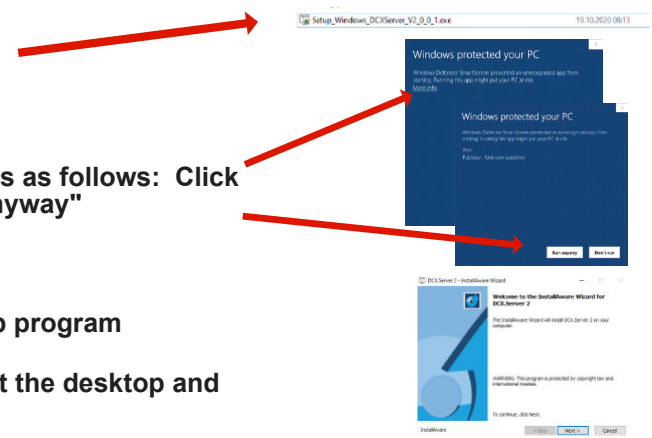

Step 1: Download the software

- You get your software via our download page: https://stute-engineering.de/index.php/en/download_en
- Select the desired product (text in blue), e.g. „DCX.Server & DCX.Client“
- Choose the software from the displayed page and start the download of the setup file

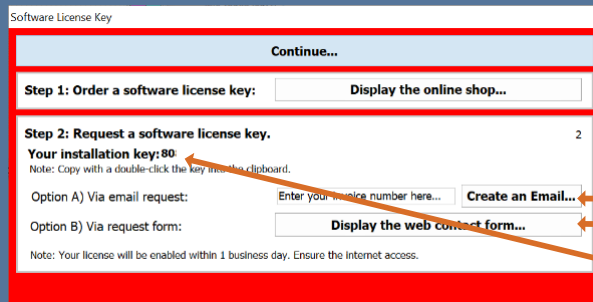

Step 2: Install the software

- Execute the downloaded setup file
- Confirm the MS-Windows messages as follows: Click on "More Information" and "Run anyway"
- Follow the instructions of the setup program
- Finally you find the program icon at the desktop and program menu

Step 3: Activate your license (Remove the demo limits)

Your software runs as a trial version, if the window below is shown. You can remove the limits as follows:

- o Visit our web shop and purchase a software license.
- o You receive an email with the invoice.
- o Ask for the license release:
- o Click here and send the pre-filled Email or
- o Click here and input the needed data into the displayed web form. Tip: Copy the installation key to the clipboard by double clicking on it.
